Move your table. Pixy will follow.

Pixy is never fixed. It is always flexible. Which makes it the perfect choice for restaurants and bars where moving tables is a daily routine. With a small carbon rod and a magnet, you can instantly move and redirect the light without using the ladder.

We think that Pixy is nicer when grouped. Combine more spots, colours, and heights to create your favourite composition over and over again.

DESIGN:

Serge Cornelissen

DRIVER

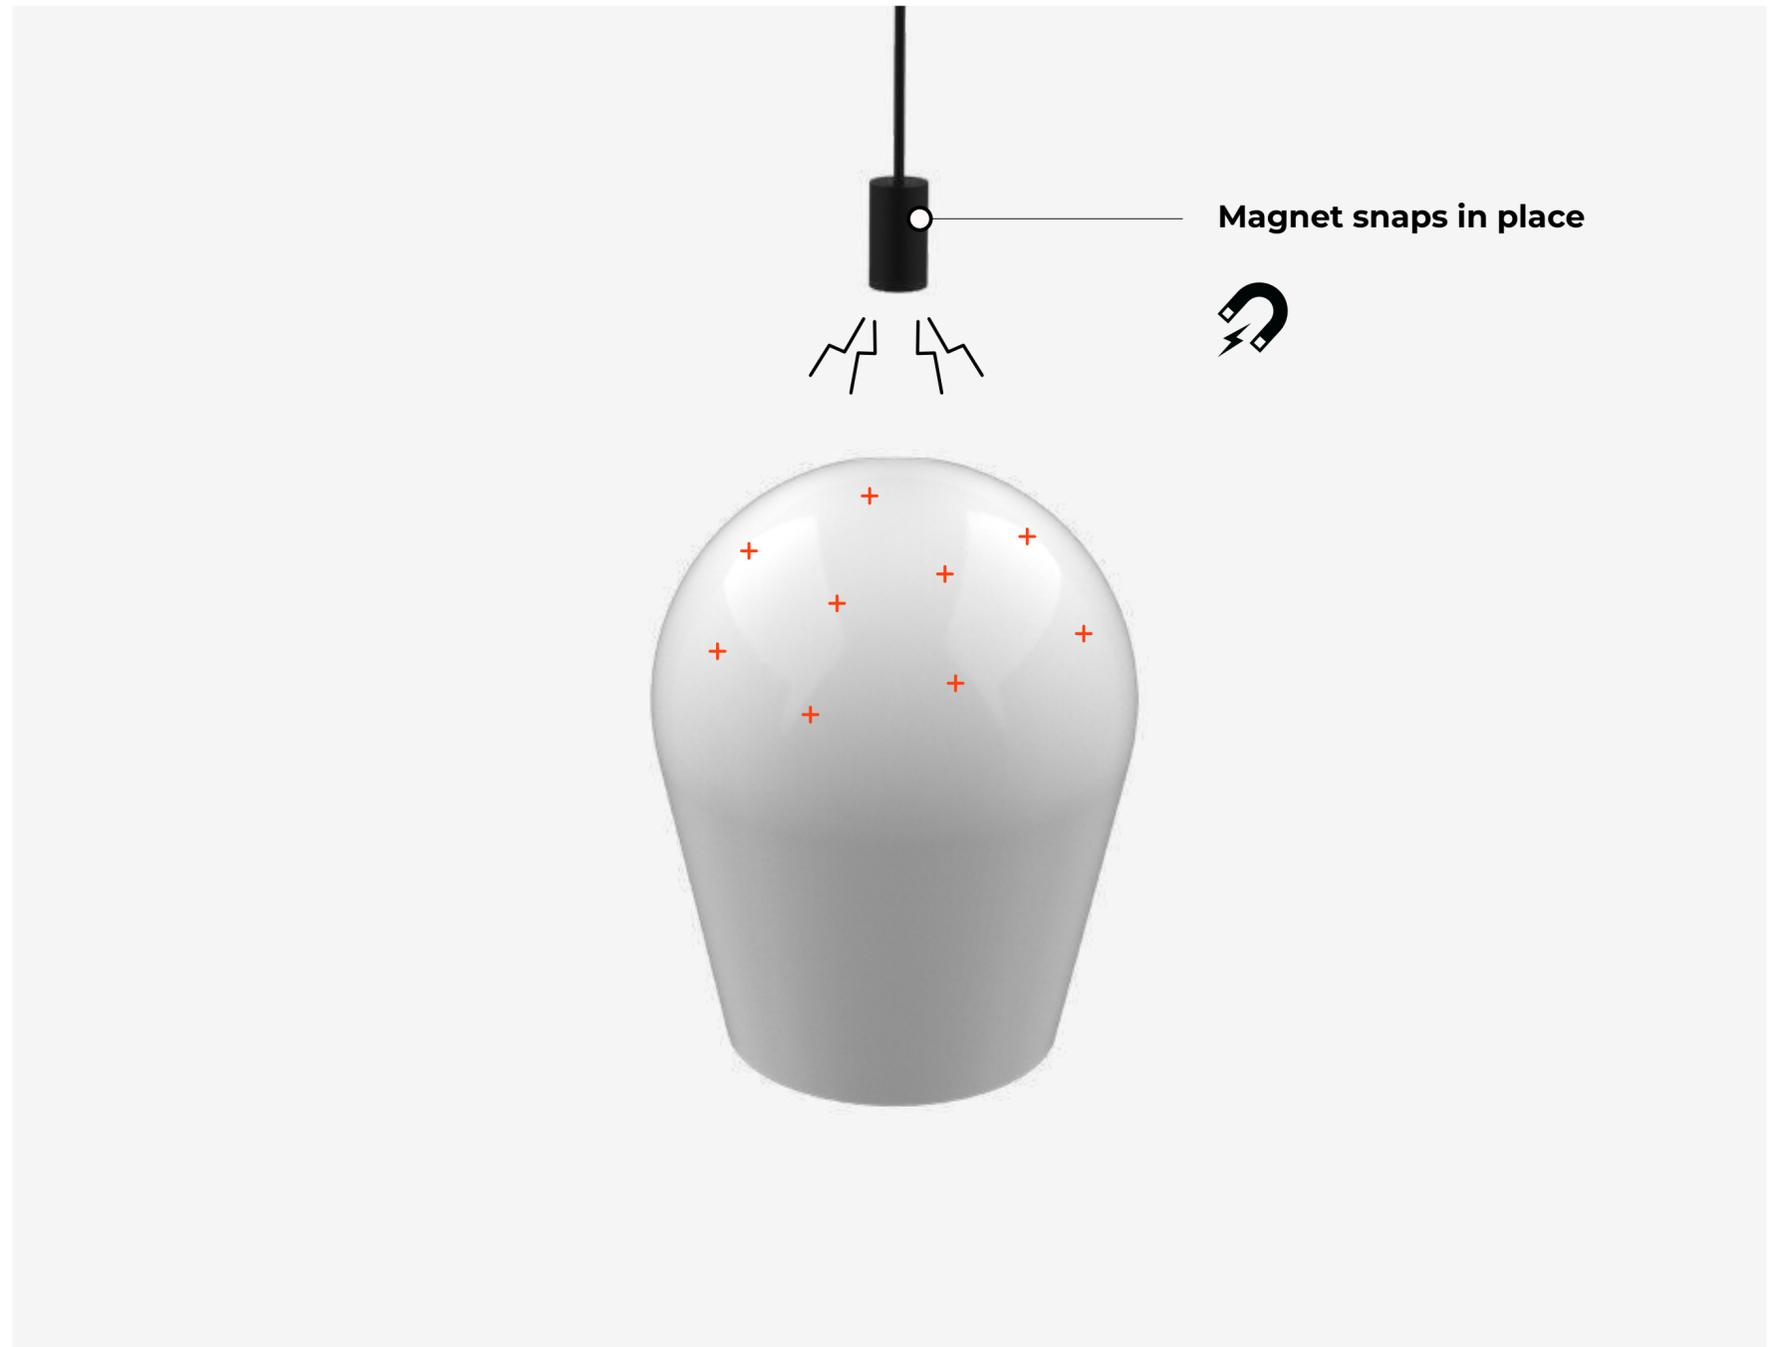

Casambi, DALI, FO

Flexible magnetic system

Magnetic system gives you maximum flexibility. Snap the magnet to luminaire body and adjust it the way it suits you best.

Magnet is strong enough to hold 4x times the weight of the luminaire itself.

Stepless orientation

Magnet allows stepless orientation. This gives you freedom when moving and redirecting the light to the desired position. It comes very handy in situations, where moving furniture is a daily routine.

Create your favourite composition

We think that Pixy is nicer when grouped. Combine more spots, colours, and heights to create your favourite composition over and over again.

Choose your colour

Choose from a range of colours to make your Pixy either blend in or stand out.

* interior of the luminaire is always black

Adjust suspension height

You can cut the suspension carbon rod stick by yourself. They are available in different lengths and can be cut with scissors. It is a very simple and straightforward process that helps you position the luminaire to the exact desired height.

*Maximal carbon rod length is 2 m.

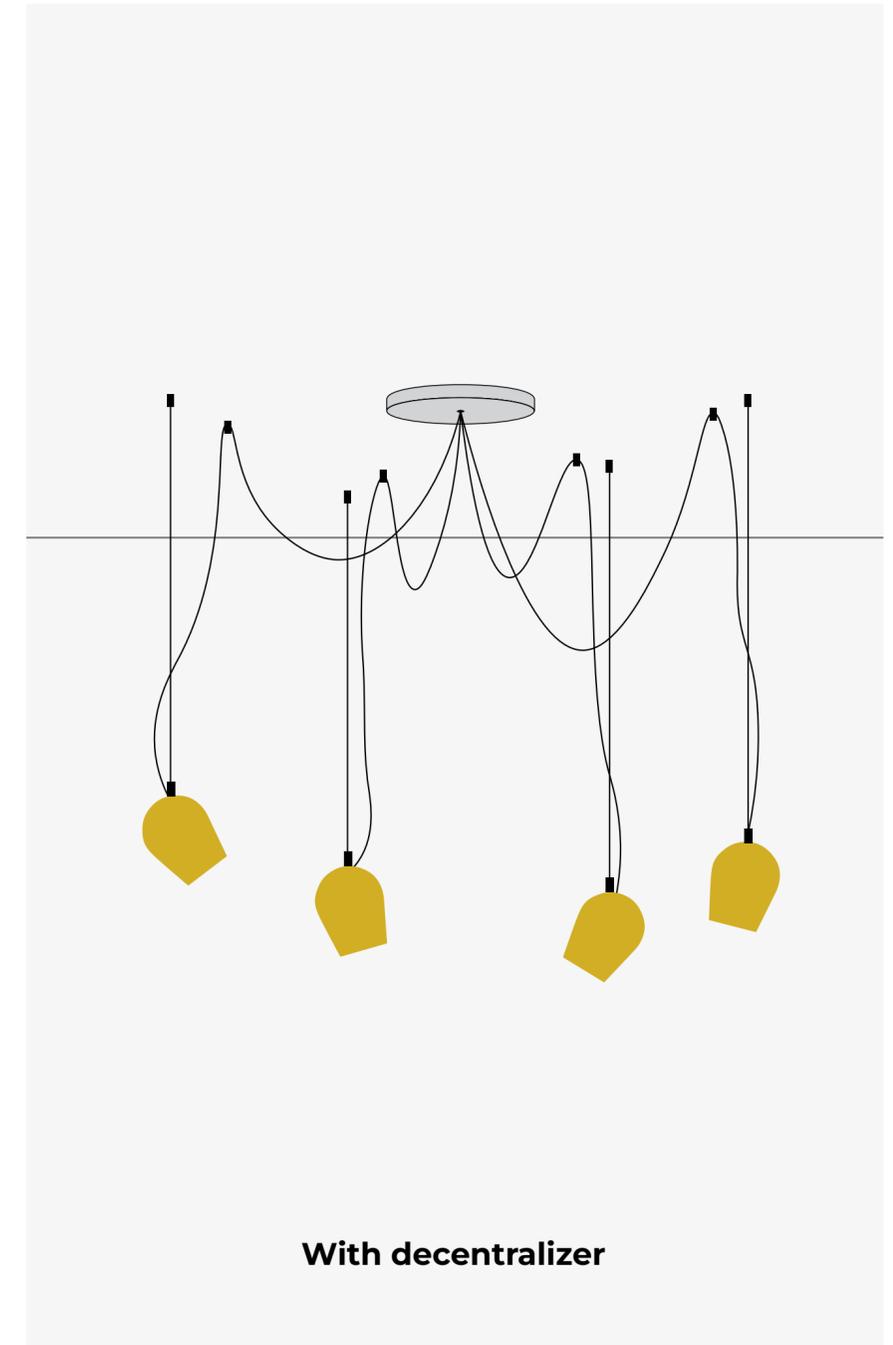

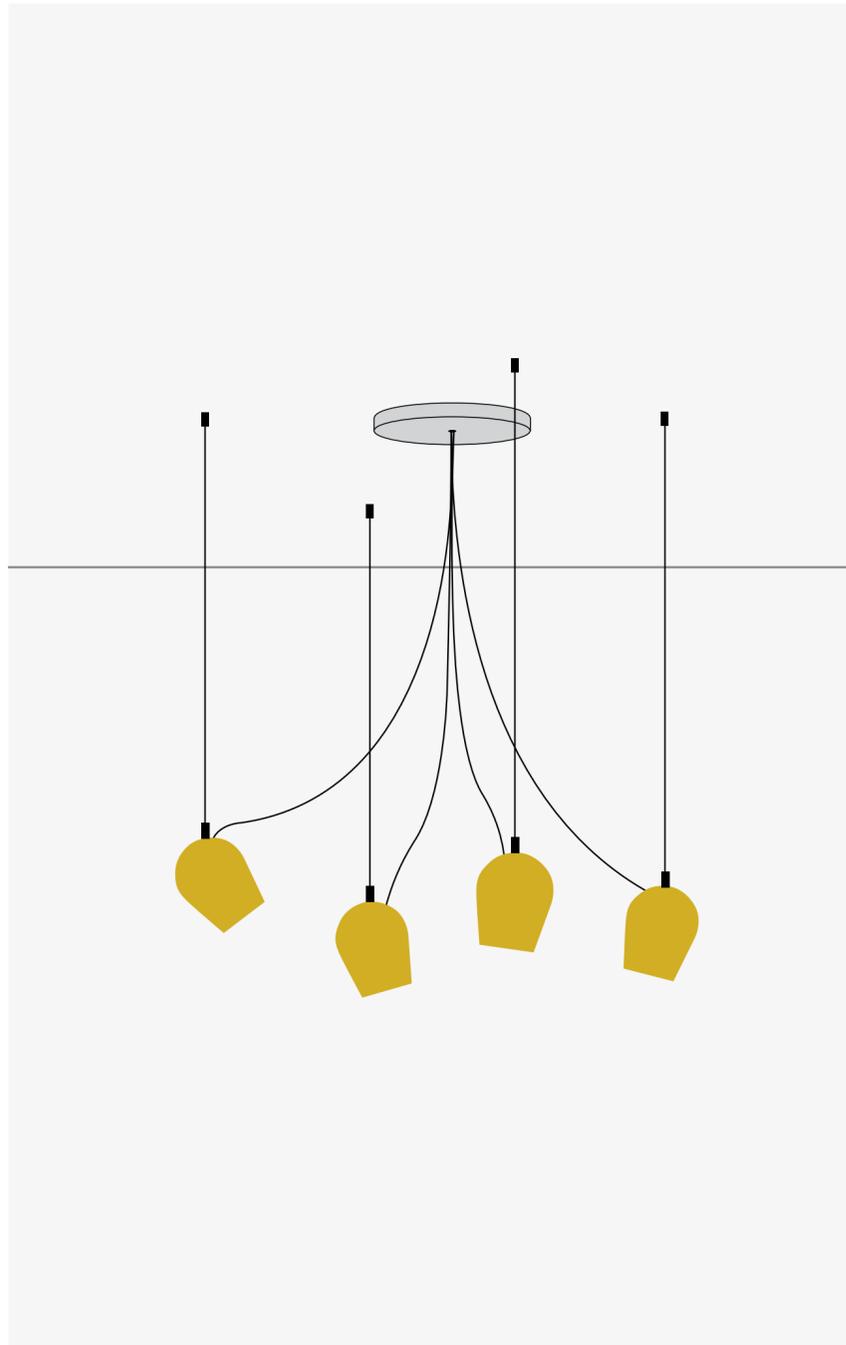

Cluster compositions

You can combine up to 7 products in all sorts of compositions. With the decentralization cable holder, cables will become part of the design, and remote power in positions will not be a problem anymore.

Decentralizer
(see accesories)

With decentralizer

A beautiful solution for concrete ceilings

Clean, minimalistic and flexible. Pixy resonates with the flexible needs of the home by creating a cosy atmosphere.

With the integrated driver in the profile, 3 or 5 spots can be flexibly rotated and dimmed.

5 spots

3 spots

Rotate it on the ceiling and on the wall, too.

Left or right? Up or down? You can change the direction of light also with the ceiling and wall version. Just rotate it. Magnets will hold it in place.

Finally, you can have the lightsaber you always wanted

Lysabel will always bring a touch of sophistication to your space, whether vertical, horizontal, inclined, single or grouped in different creative compositions. It is a slender homogeneously lit tube without shadows. Its look is clean, minimalistic and refined, with every last detail carefully crafted. Looks fragile, but it's not. Its force is versatile – for the power of light and of appearance.

Always slim in different lengths

Lysabel is available in different sizes. Combine them and create elegant compositions.

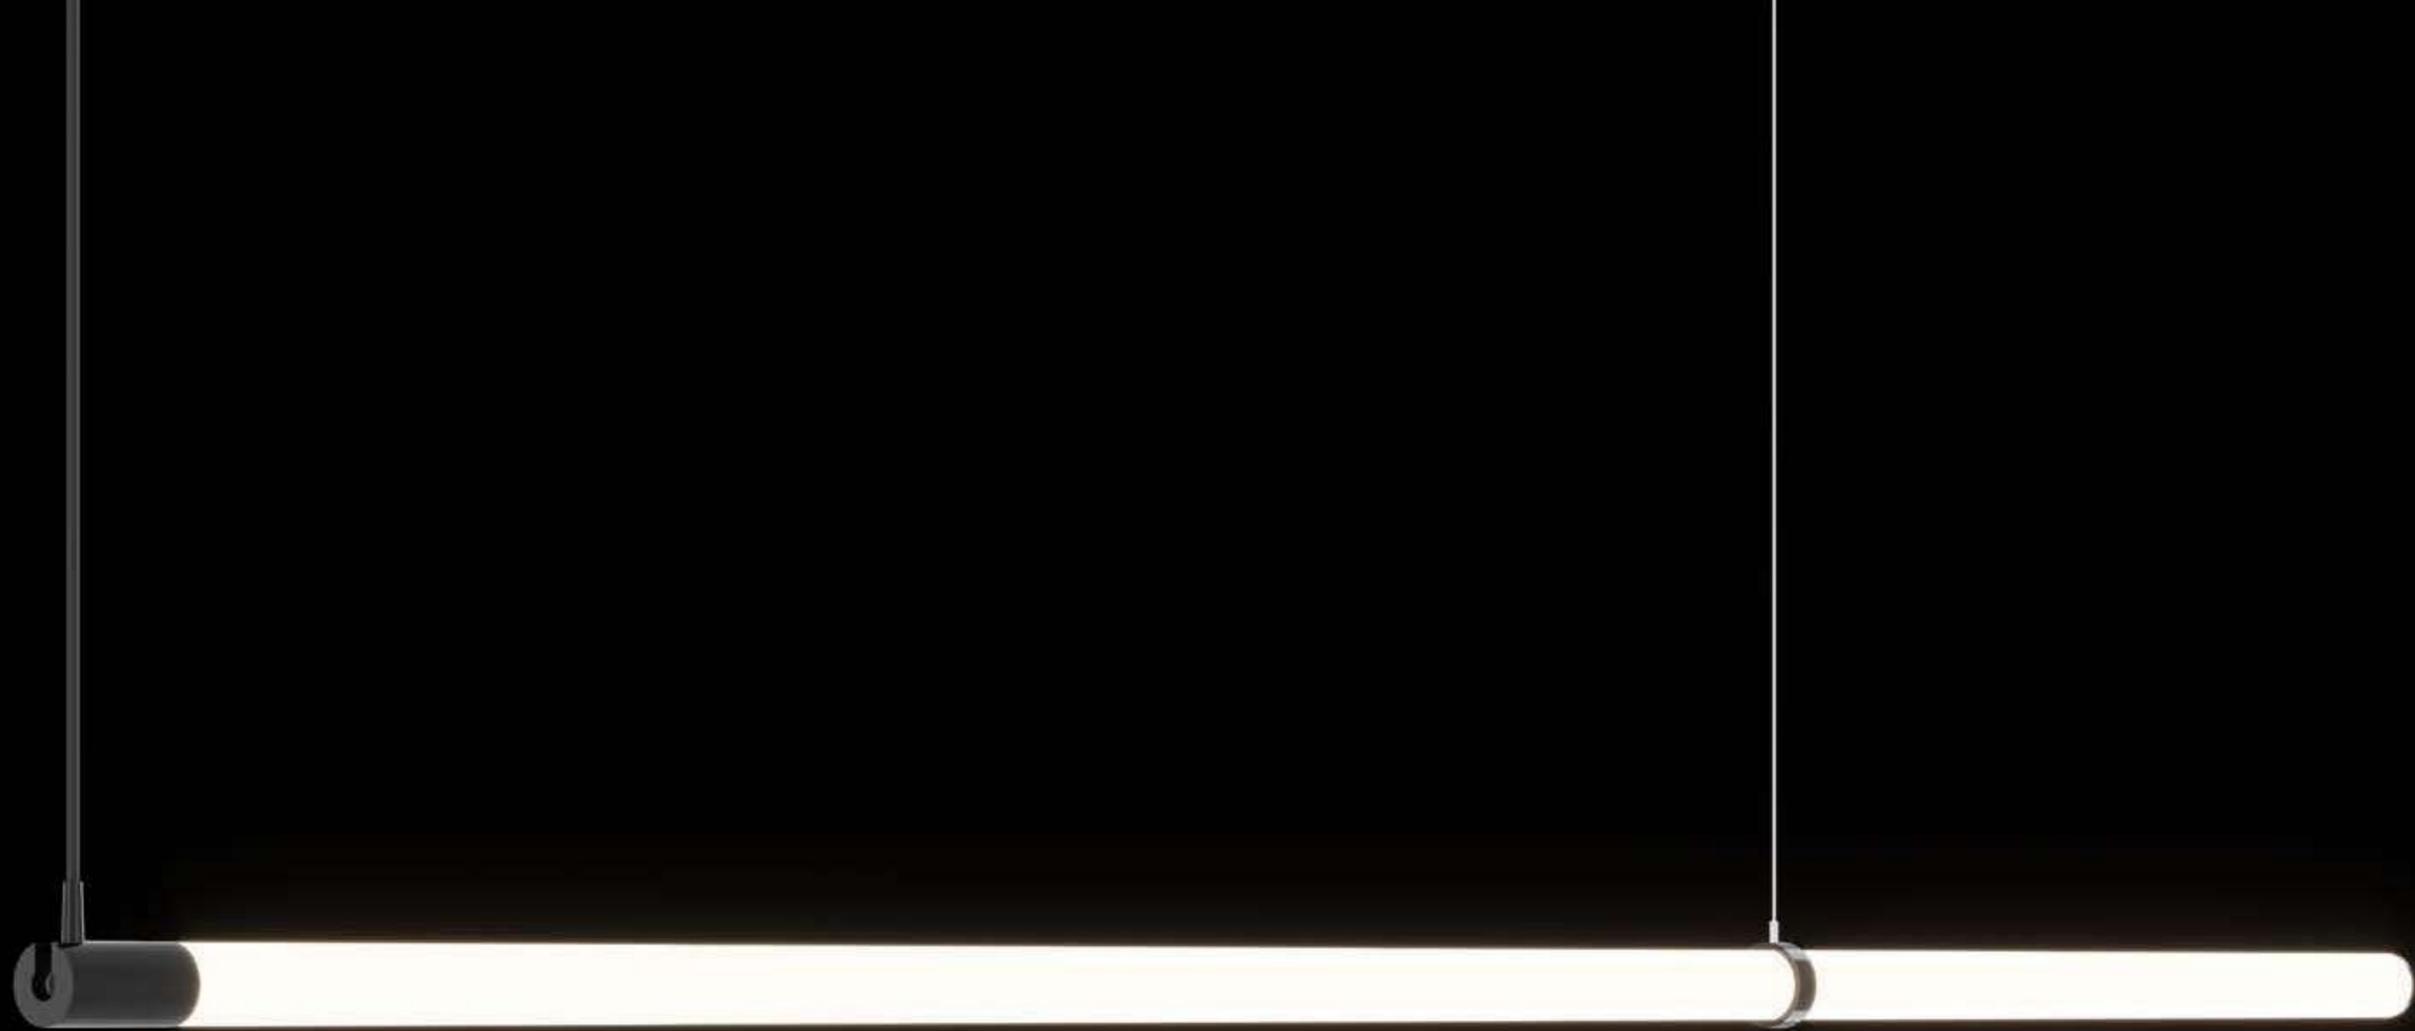

Watch video

Flexible to incline

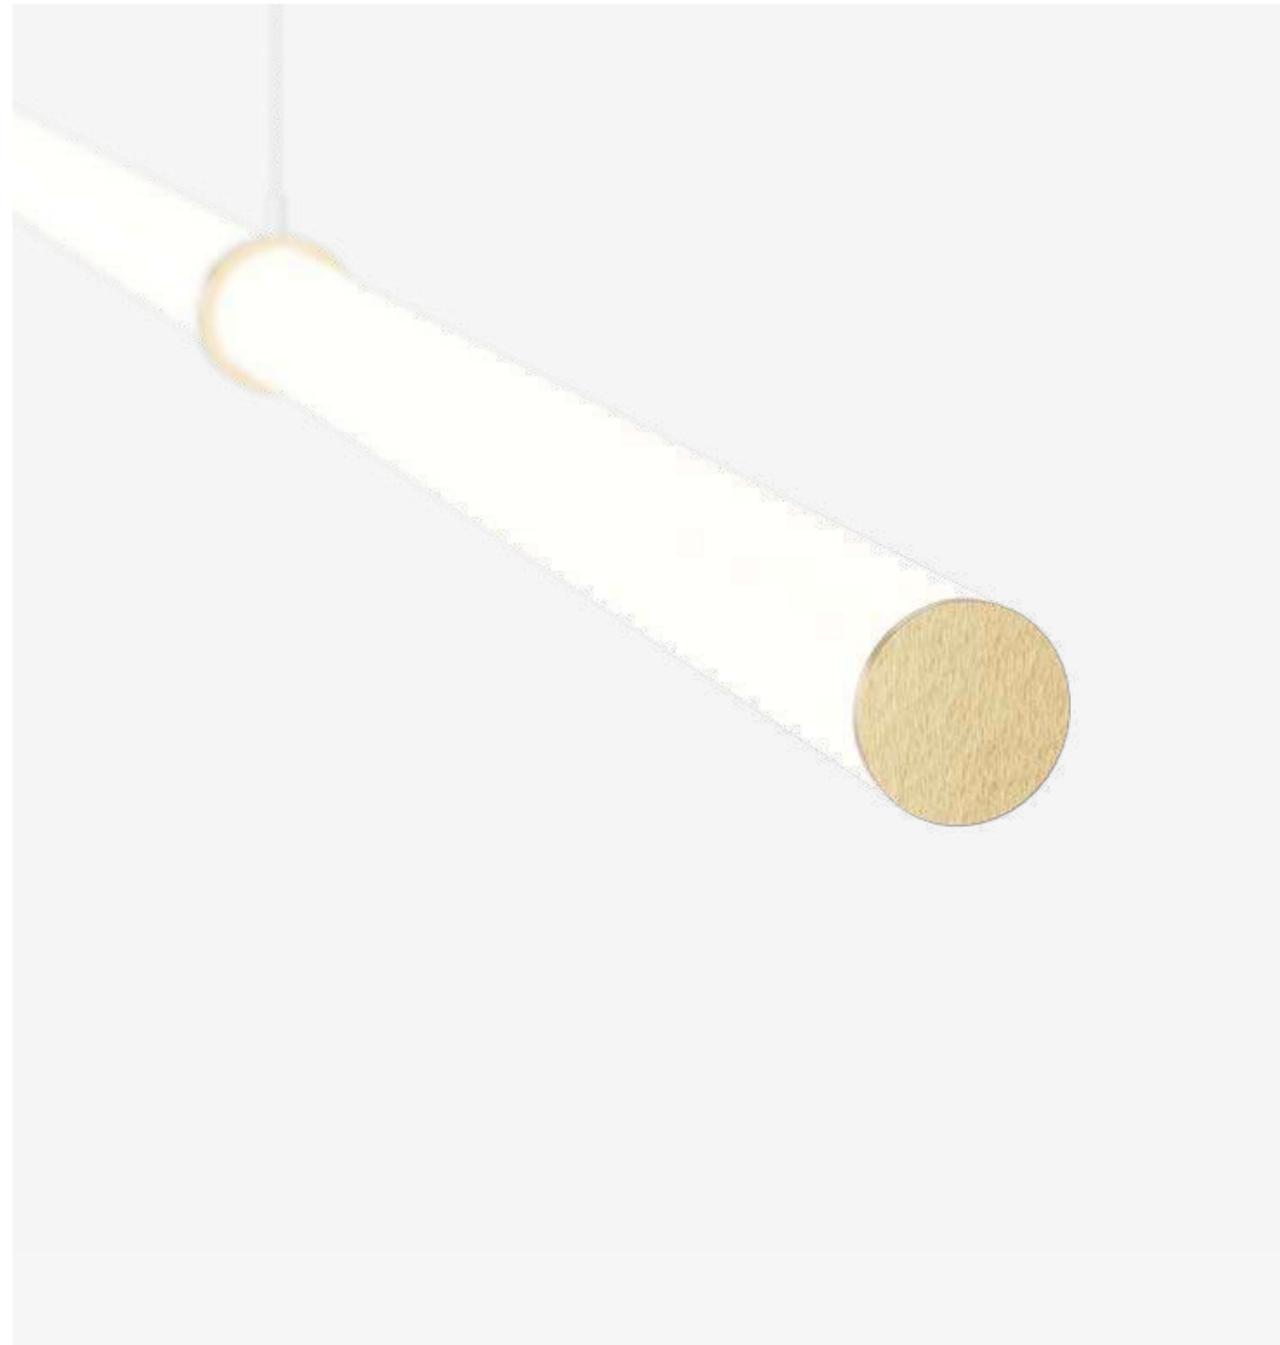

Horizontal or vertical, the inclination is simple due to the detail inspired by the iron power cord flexibility. The products can be mounted horizontally with a suspension ring.

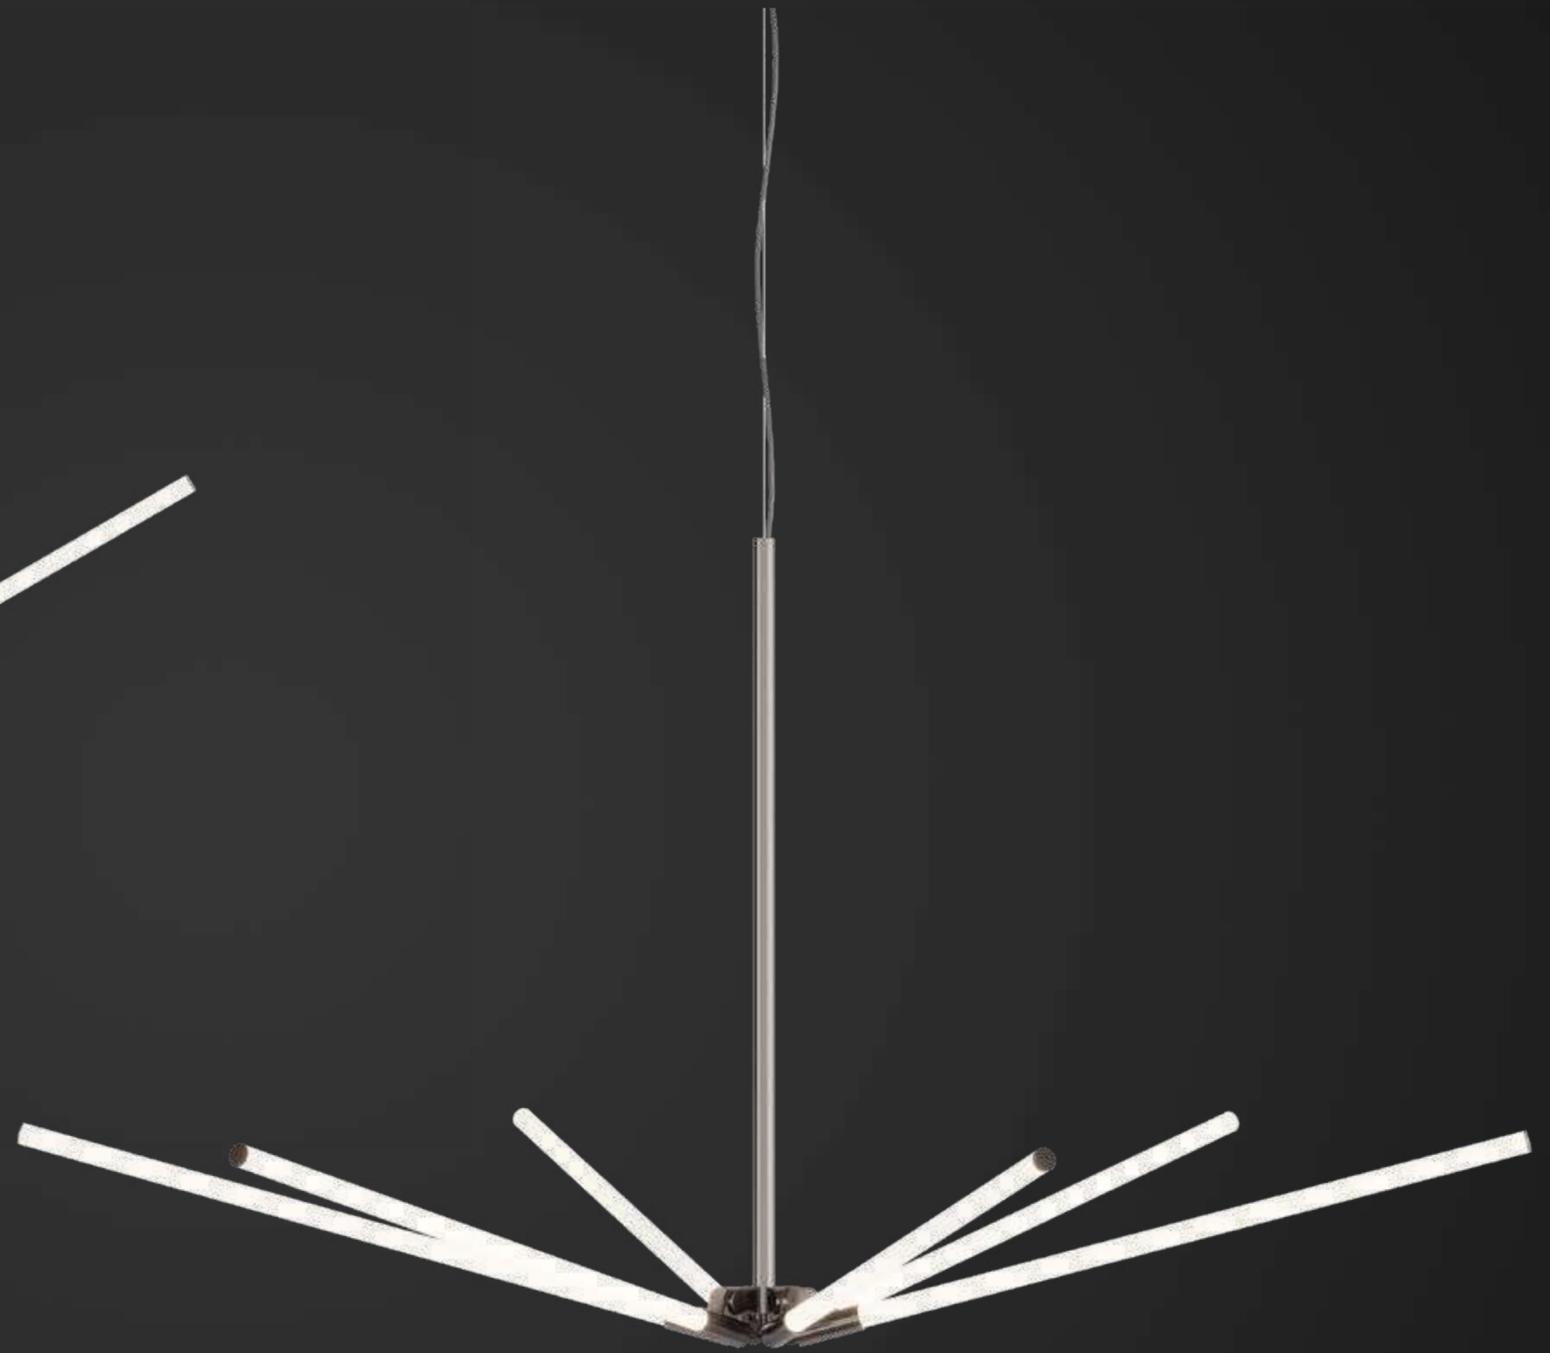

It is also beautiful in horizontally

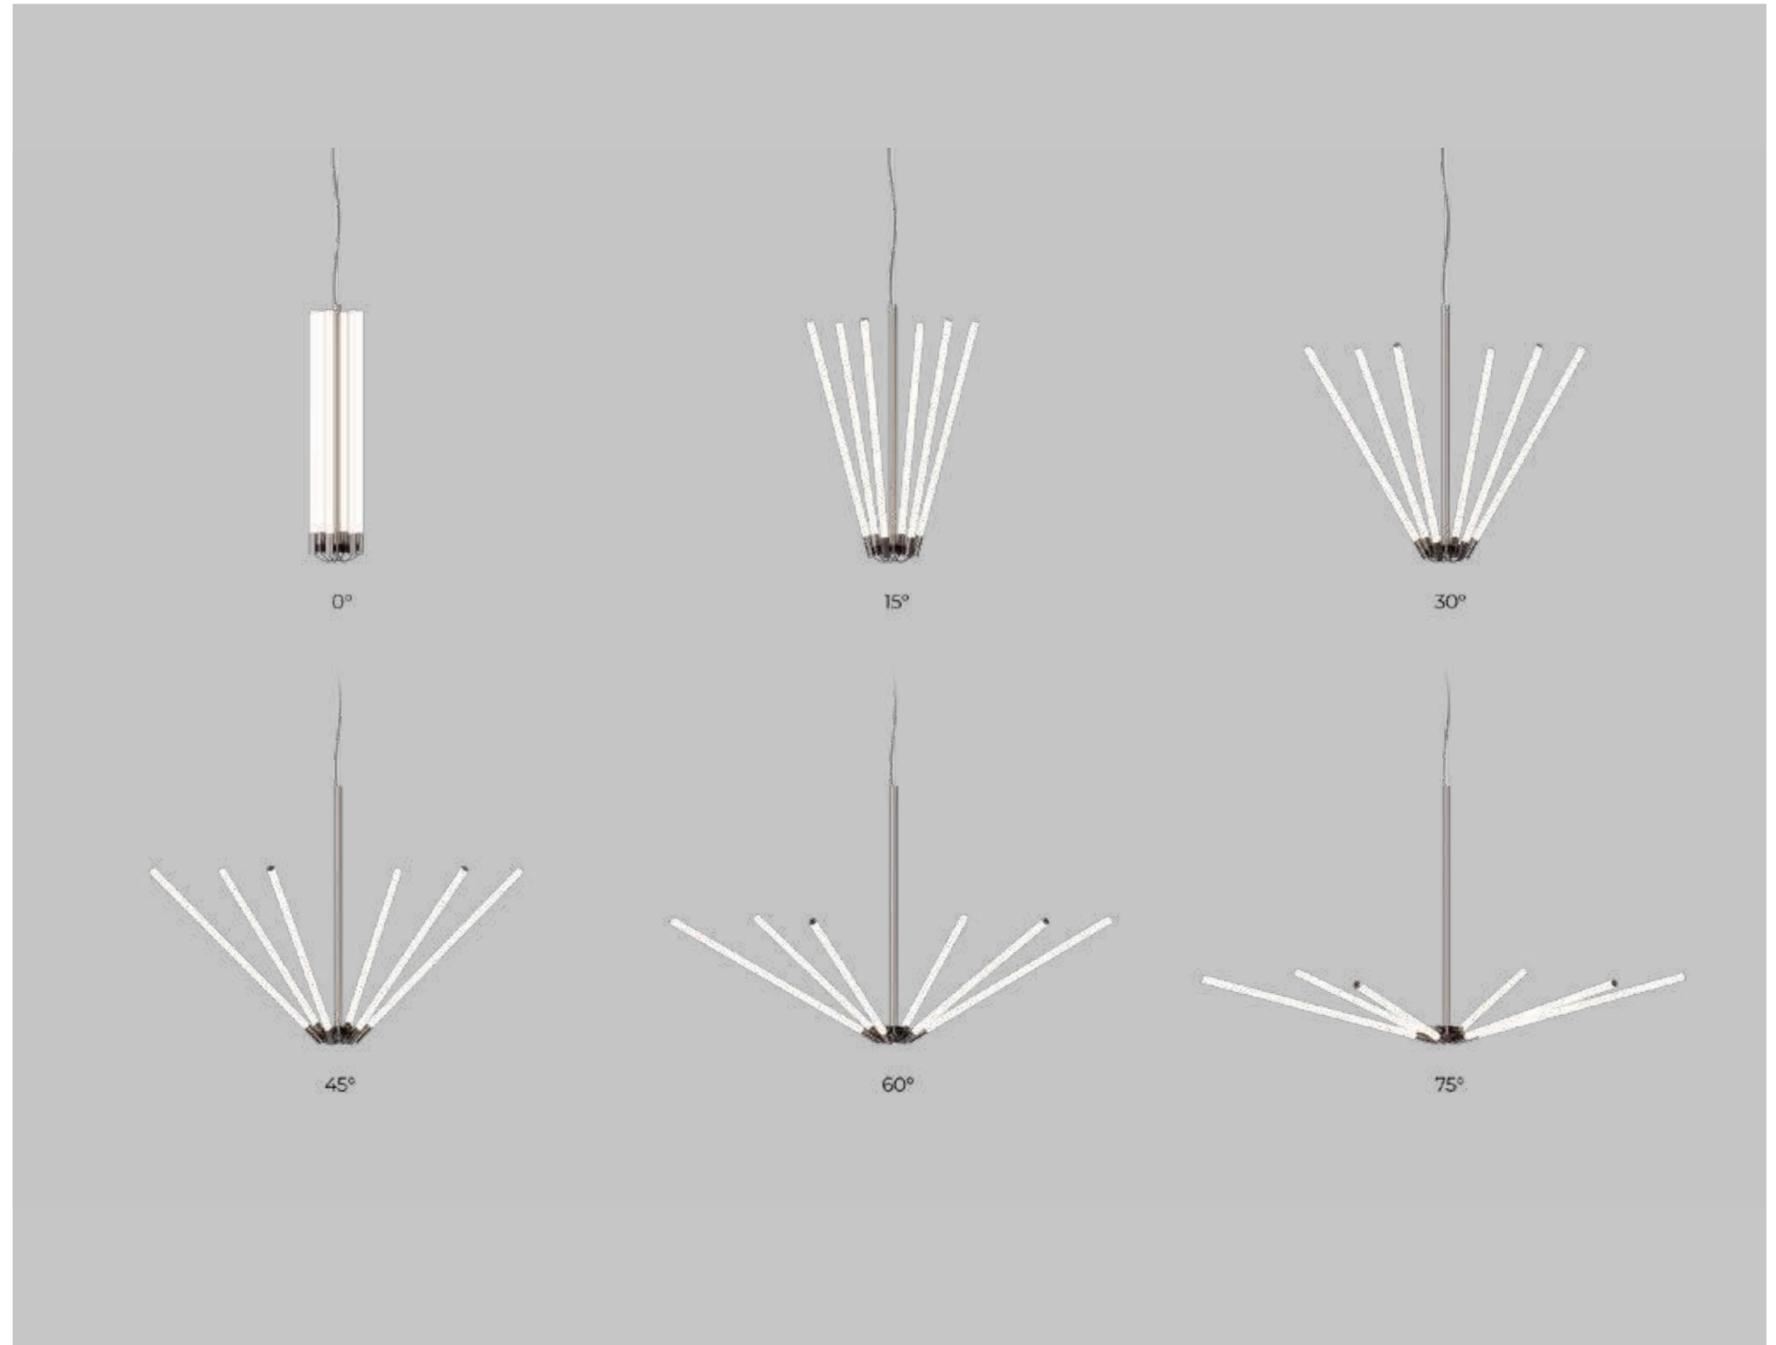

It can be wholly horizontal or a little inclined with a simple suspension ring. The ring also functions as an aesthetic accessory.

One product, different looks

The different inclination of single tubes totally changes the product's appearance. Set it the way you like it, and change it over time. It will be like having a new luminaire.

Pyrymyd

Ec(h)o friendly

reddot design award
winner

Office / Visualization: Studio Duaviz

Office with Deco and LFO optic / Visualization: DSE visualisation

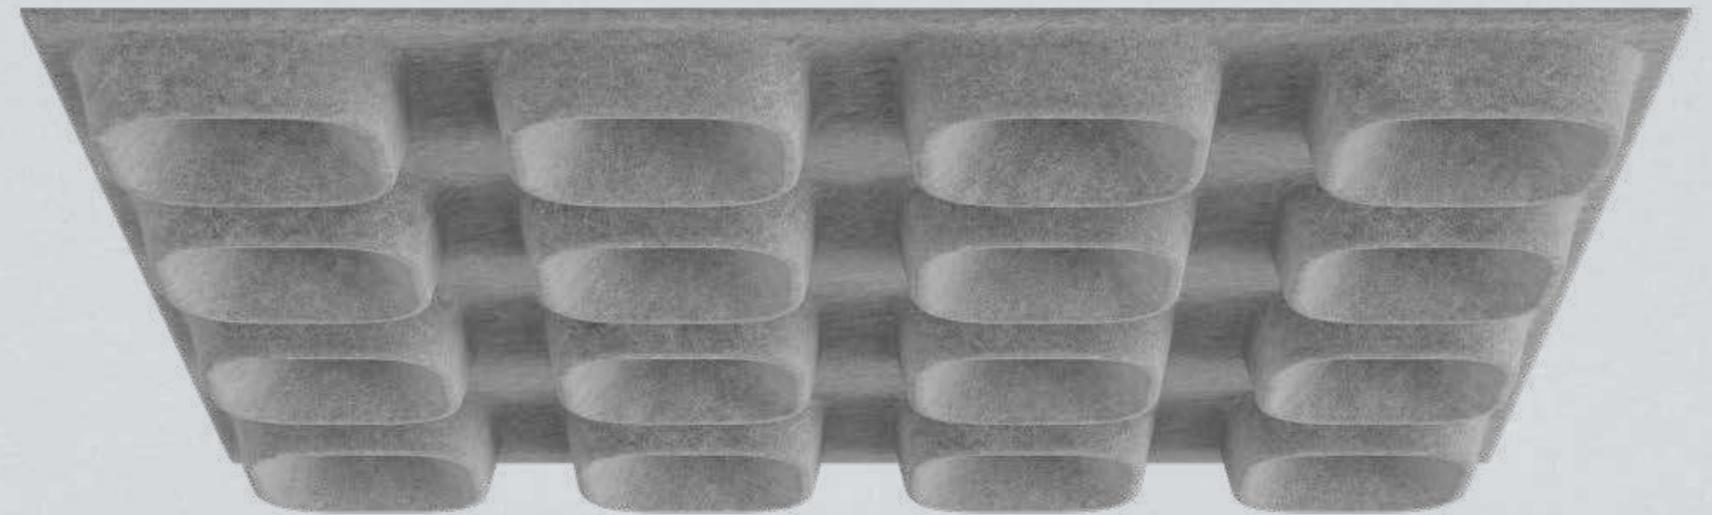

No noise. No glare. No pollution.

You can finally forget about those unaesthetic acoustic ceilings. Here is Pyrymyd, an advanced all-in-one product, able to create various scenarios and personalized micro ambiances. Therefore, it is a perfect pick for offices and large open spaces.

3D ecofriendly acoustic panels are made from 100 % recyclable fibre, in order to guarantee an echo friendly acoustic performance. And above all things, it provides efficient homogeneous light distribution.

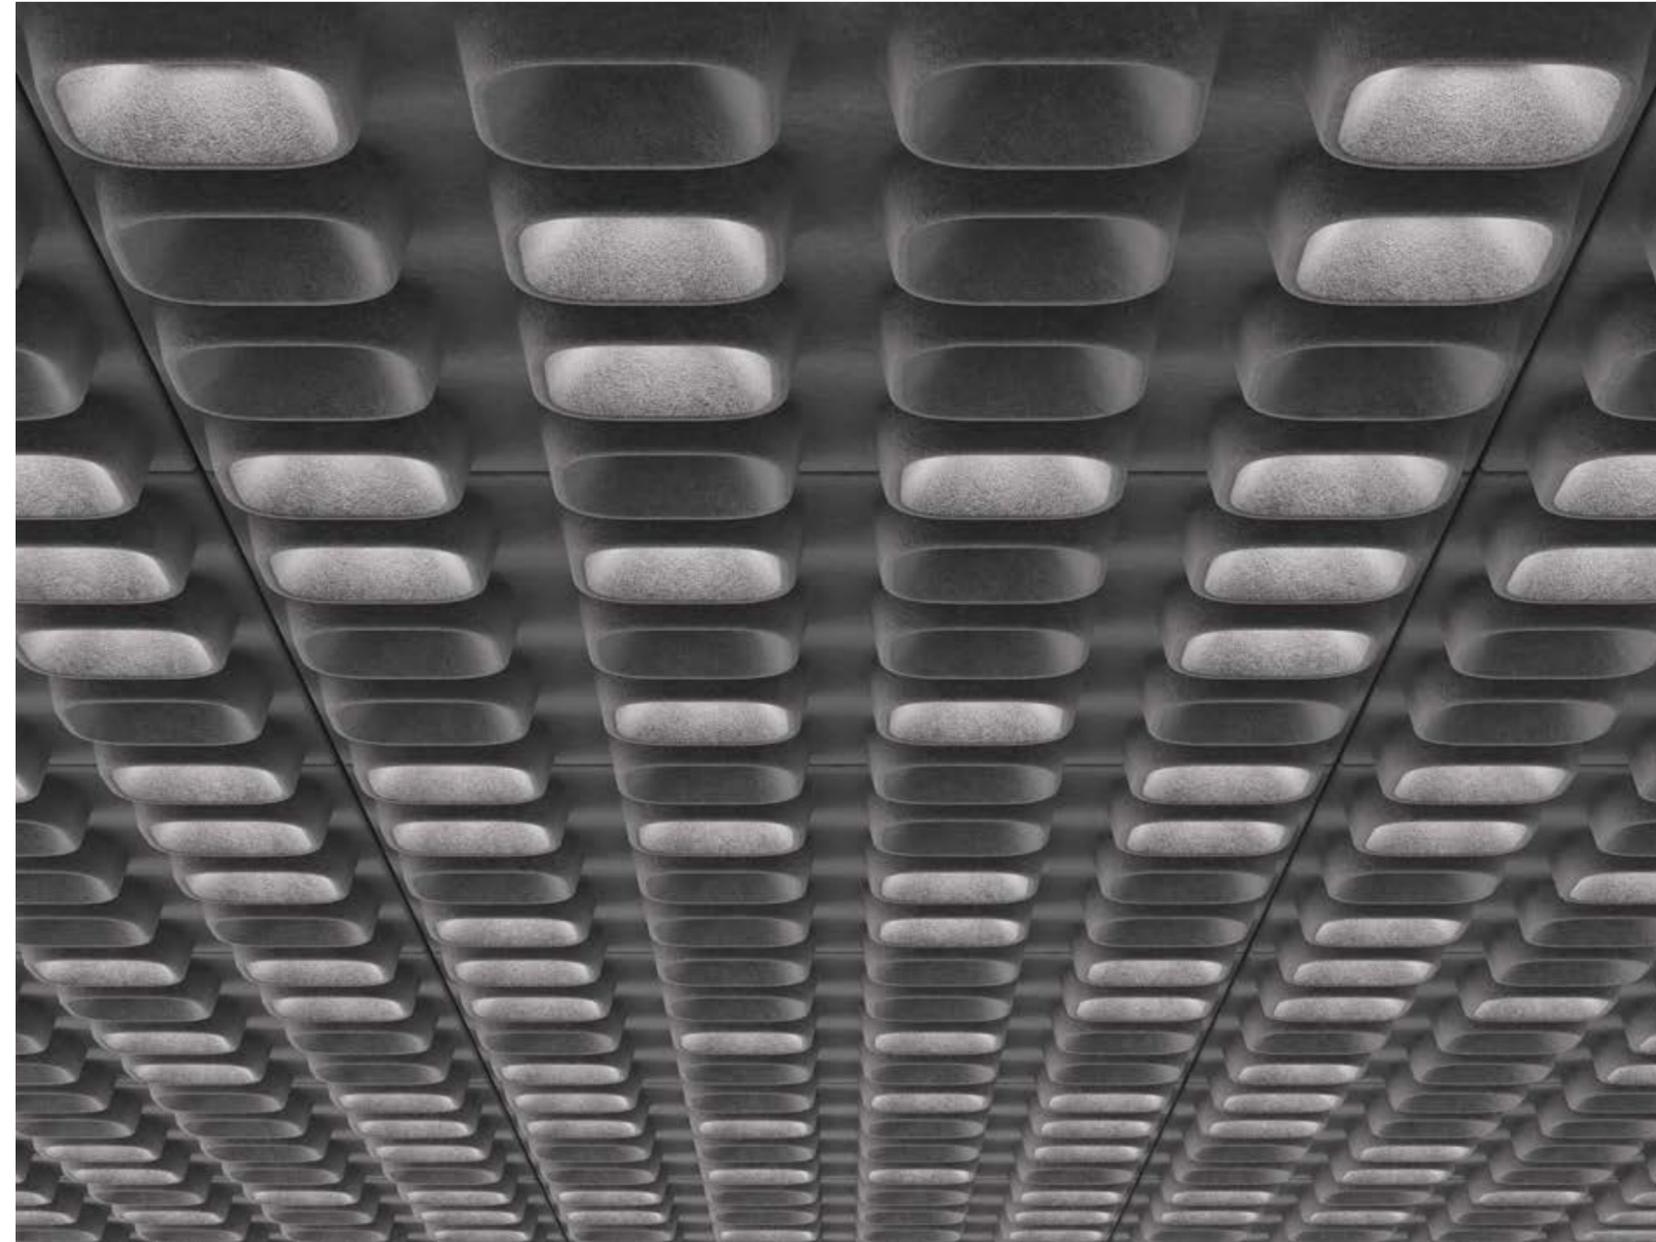

DESIGN:

Serge & Robert Cornelissen

It's luminaire. It's a ceiling.

Whether you call it an acoustic ceiling with integrated lighting or vice versa, it addresses three key issues simultaneously: it enhances acoustics, provides high-quality illumination without any glare, and replaces the ceiling. Plus, it's easy to install.

Recycled and fire resistant material

REACTION TO FIRE CLASSIFICATION

B – s2, d0

MATERIAL SOURCING

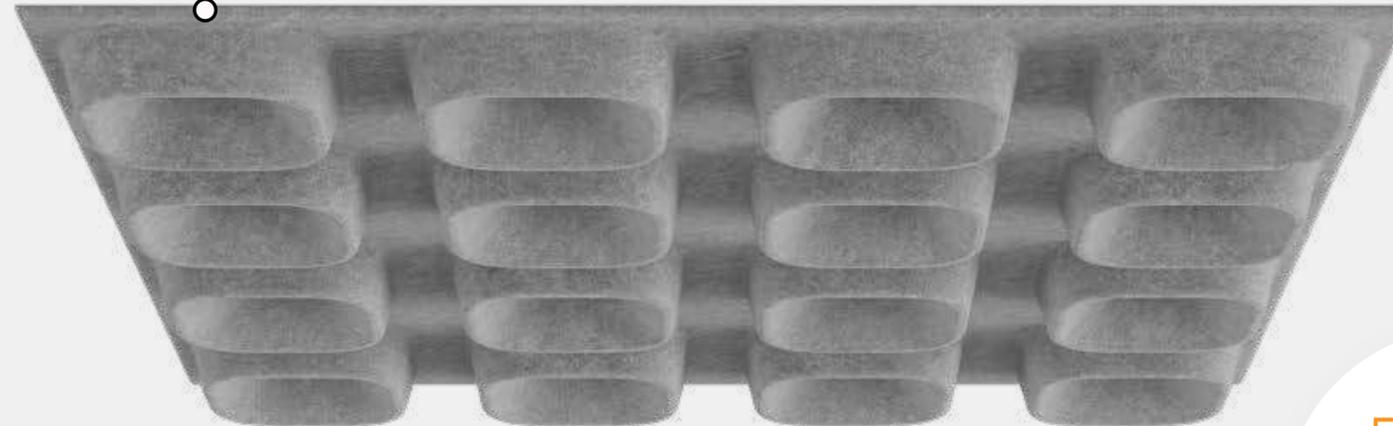

The acoustic panels are made from up to 60% recycled material.

END OF LIFE

The acoustic panel is 100% recyclable at the end of its life.

LFO VERSION

No, it's not off.

Are you wondering where the light comes from? With the Bartenbach LFO optic, Pyrymyd illuminates the space pleasantly with low glare and without seeing the light source. It looks like it is off, but the light will be there.

Bartenbach LFO optic

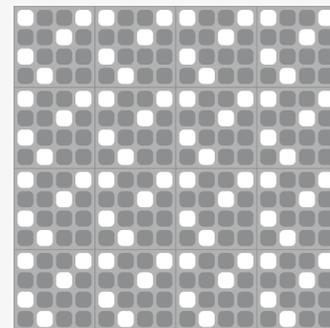

4 central modules are illuminated

DECO VERSION

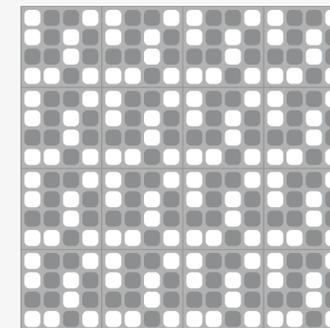

Random patterns of light

With DECO version your ceiling will be unique,
creative, different from all others. No two layouts
are the same.

Deco 5

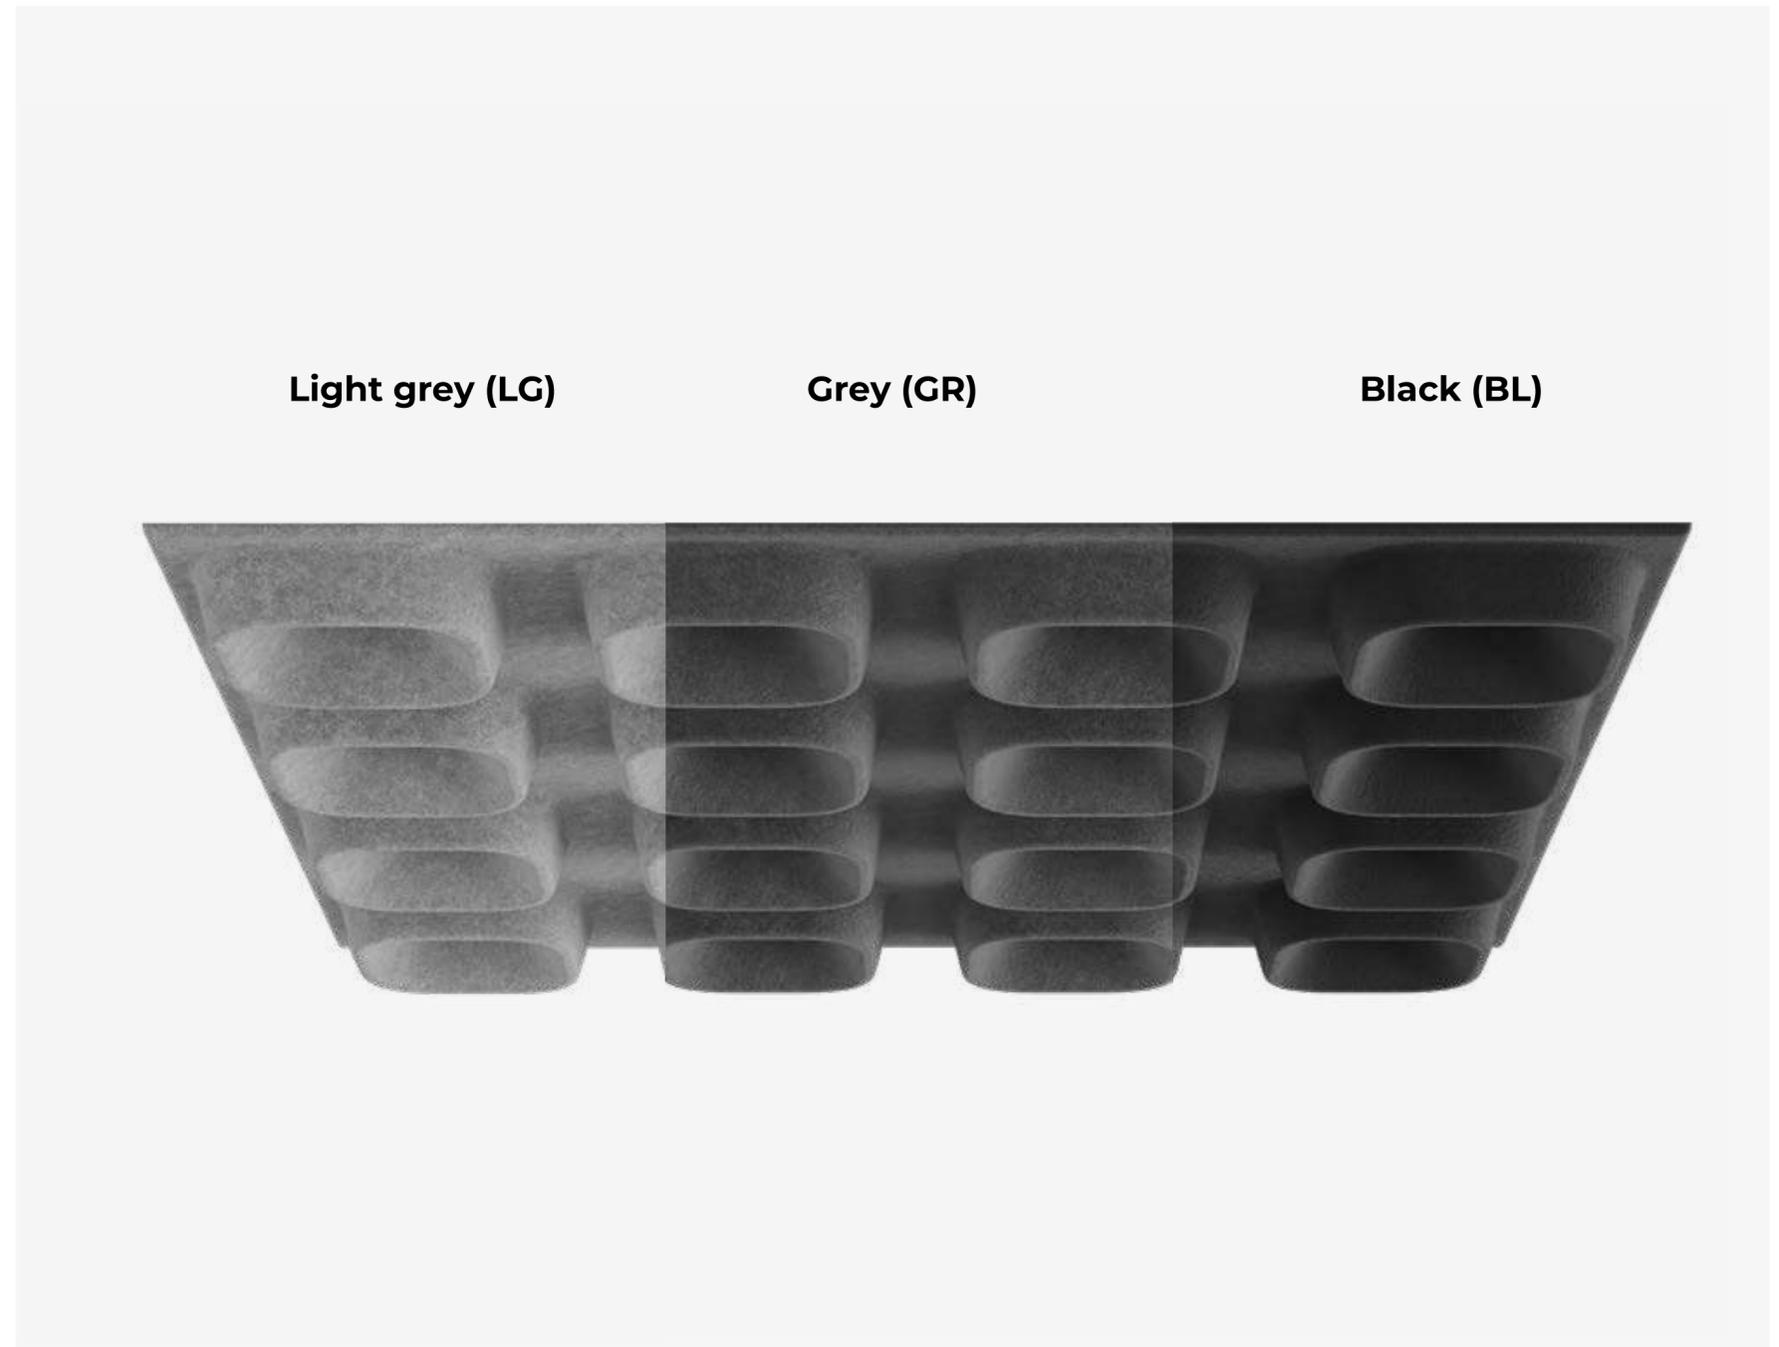

Deco 8

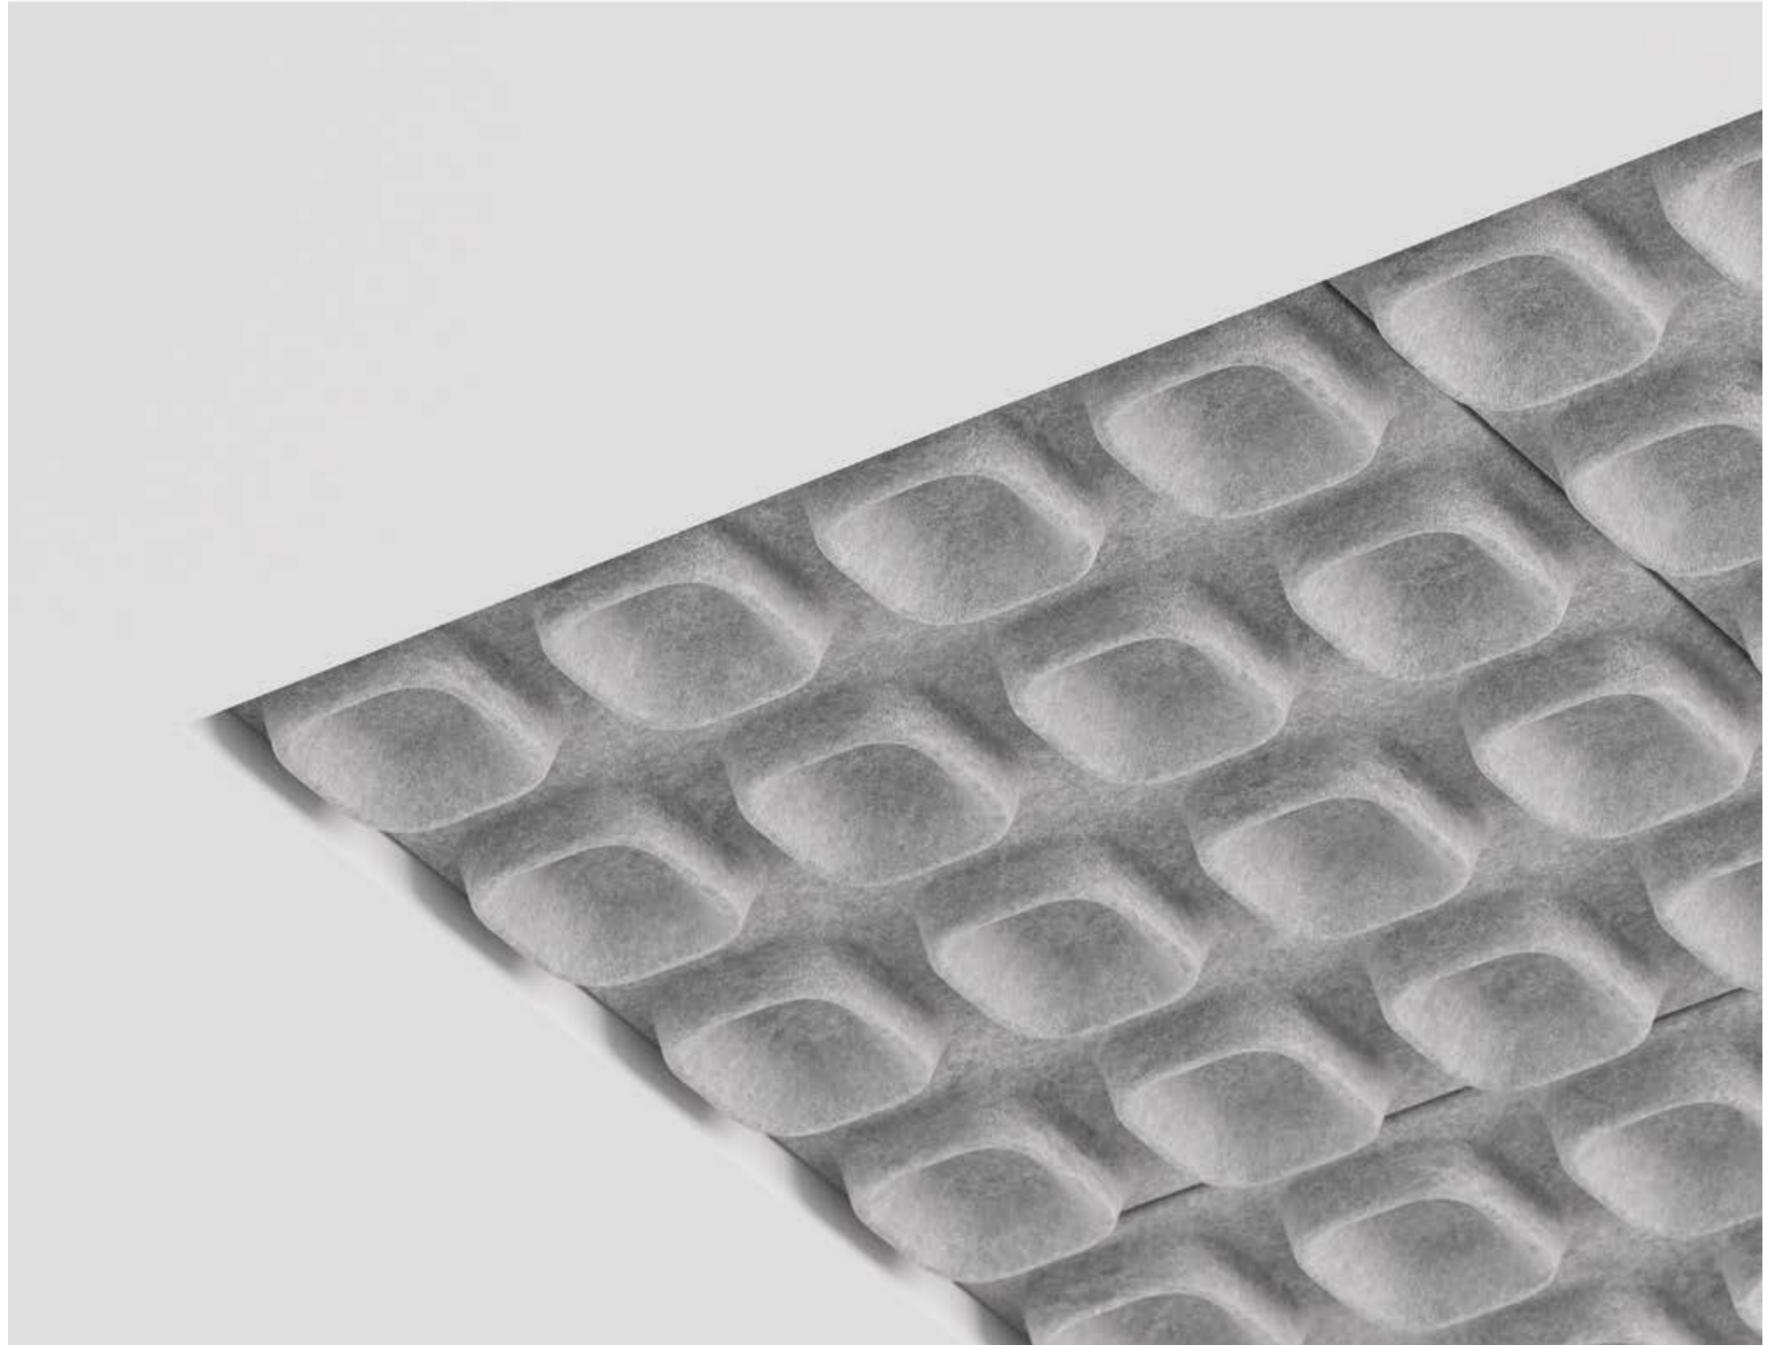

Three shades of grey

It's just a matter of taste and the feeling you want to create. Choose brighter tones for a more fresh, open appearance and optically higher ceilings.

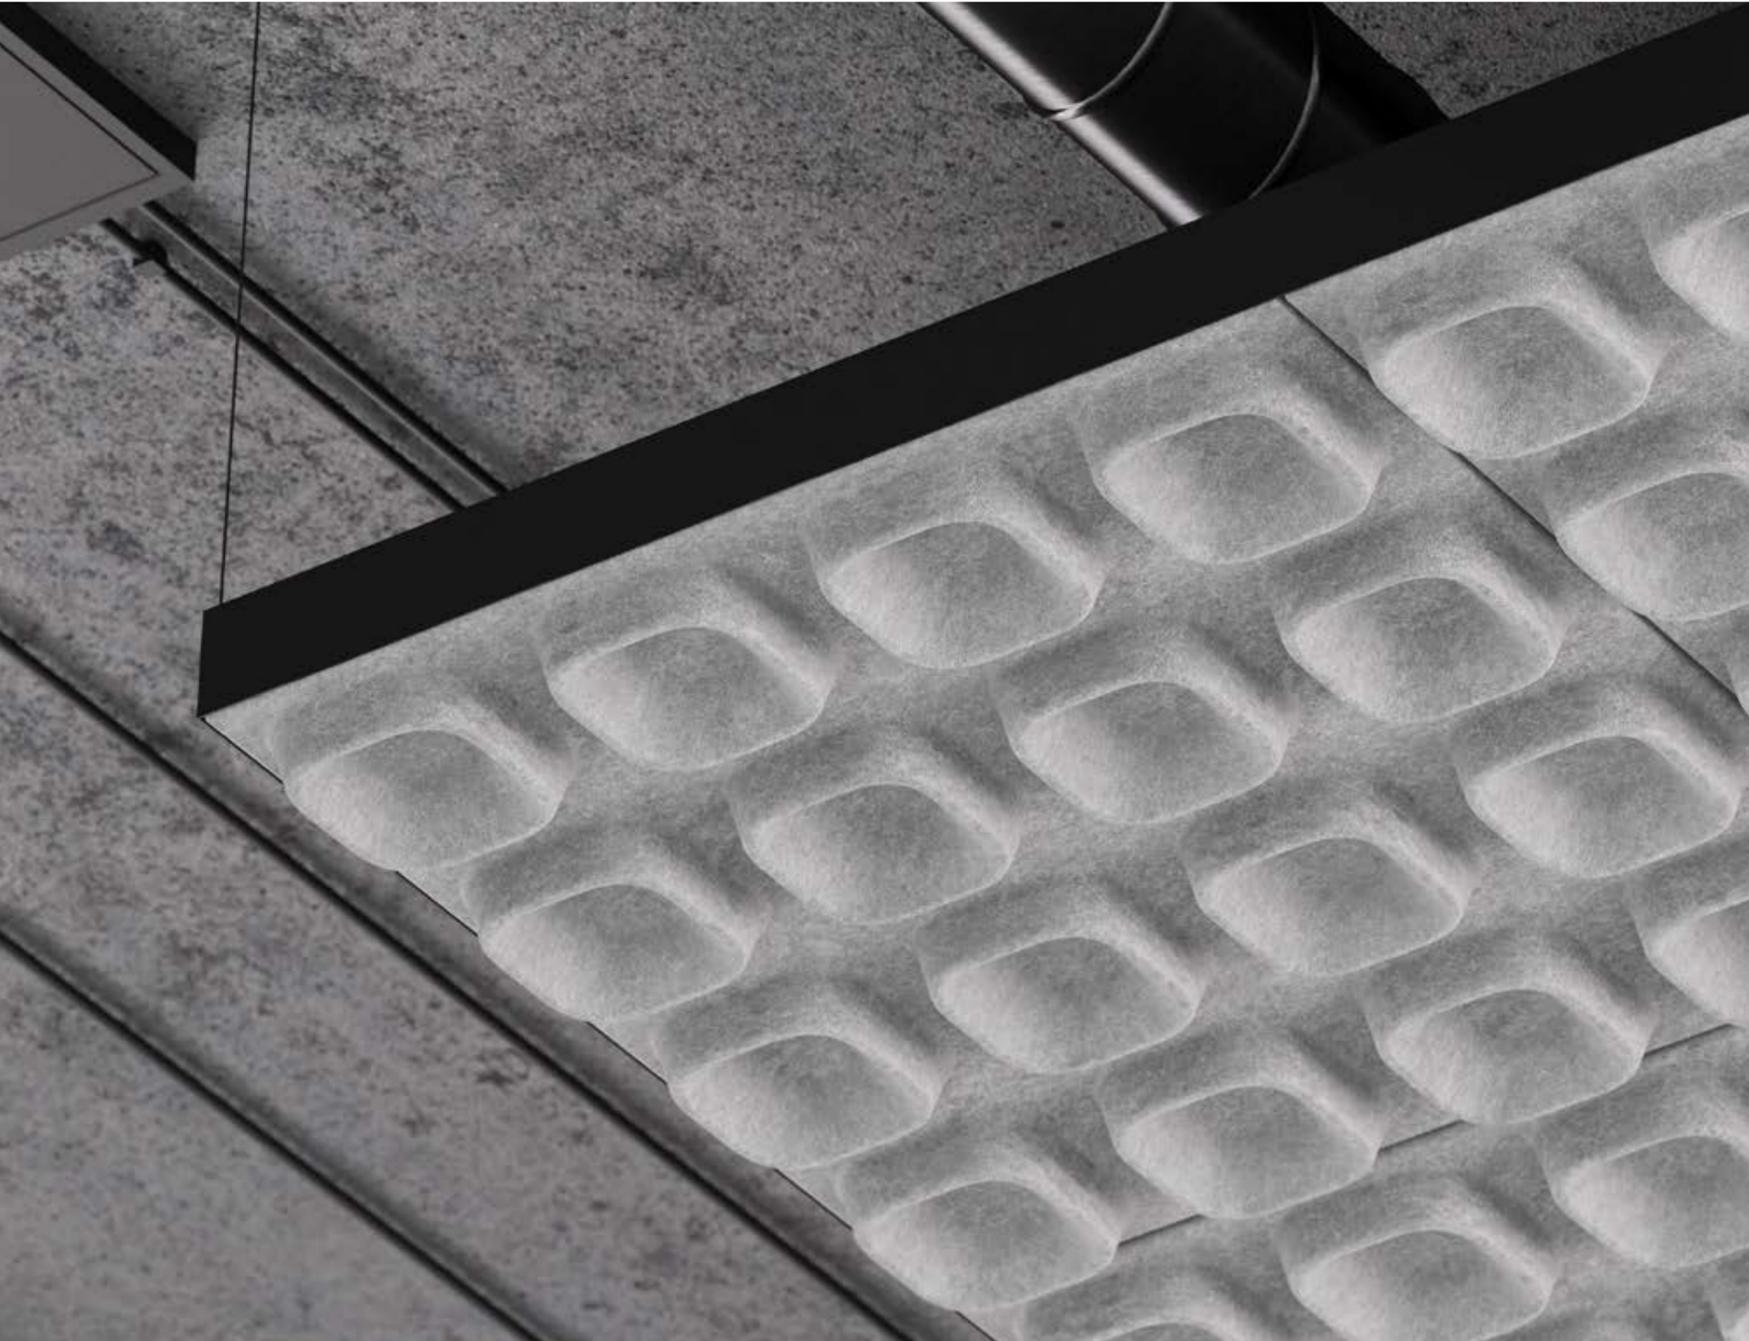

Click-in system installation

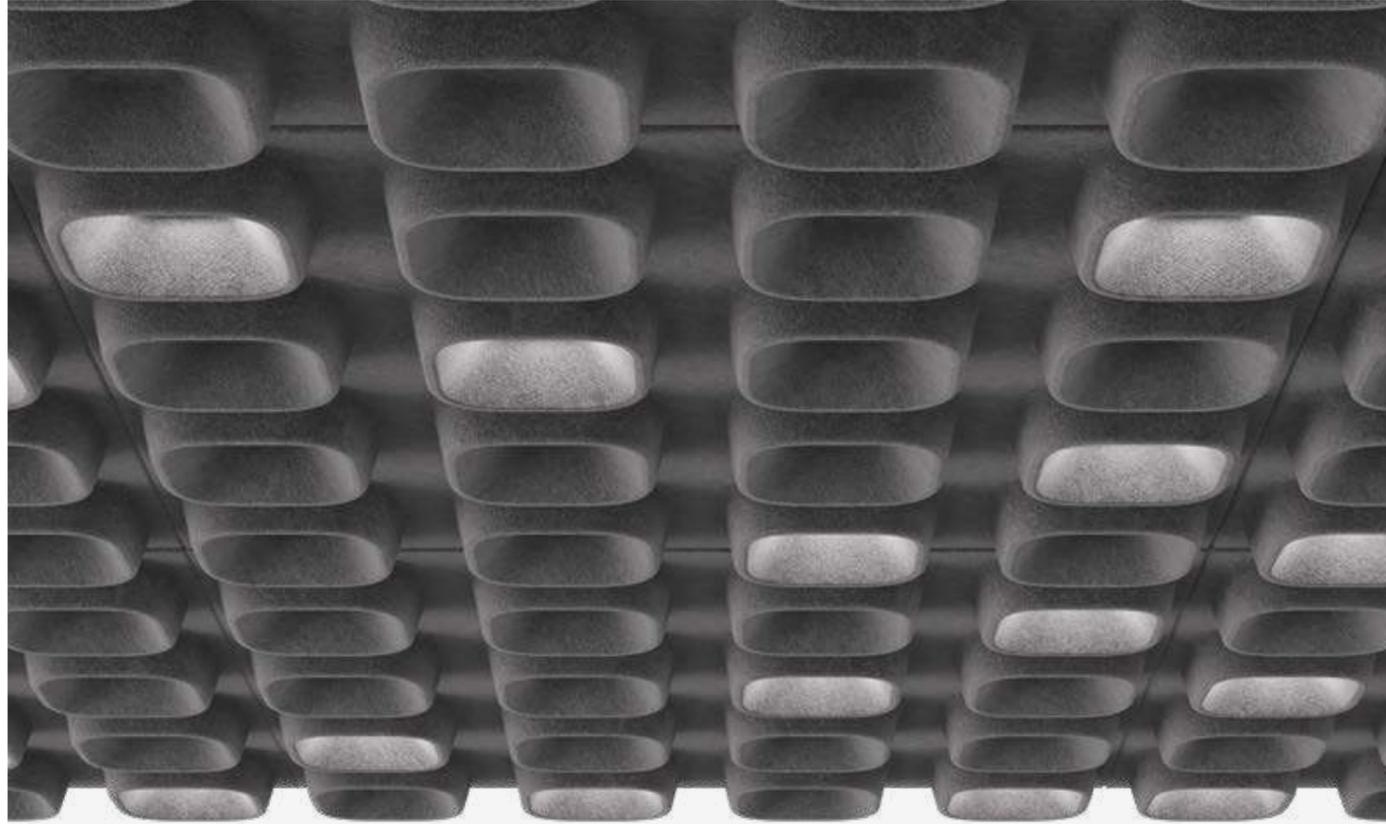

With minimal distance between the panels and
the ceiling
